HIGH-END GRAPHICS CONTROLLER
FOR VISUAL DISPLAY SYSTEMS

PRODUCT DESCRIPTION

NPX-4800-G3.0 – INNOVATIVE AND CONVINCING

netPIX 4800 G3.0 is a network based graphic controller for the management of video wall systems, single displays or projectors. Through its MultiScreen-ability any display surfaces can be realized. The controller creates a big joined desktop for network-applications, video and graphic sources. At the heart of the NPX-4800 works the powerful SBC in combination with the backplane with switch fabric. The new NPX-4800 Controller offers an ultra high performance bus, cost-effective INTEL® XEON® CPUs, 64Bit technology and high bandwidth trough a Switch Fabric BUS with 192GB/s. These new technologies guarantee the revolutionary and powerful performance of the next generation of the NPX Family in any control room application.

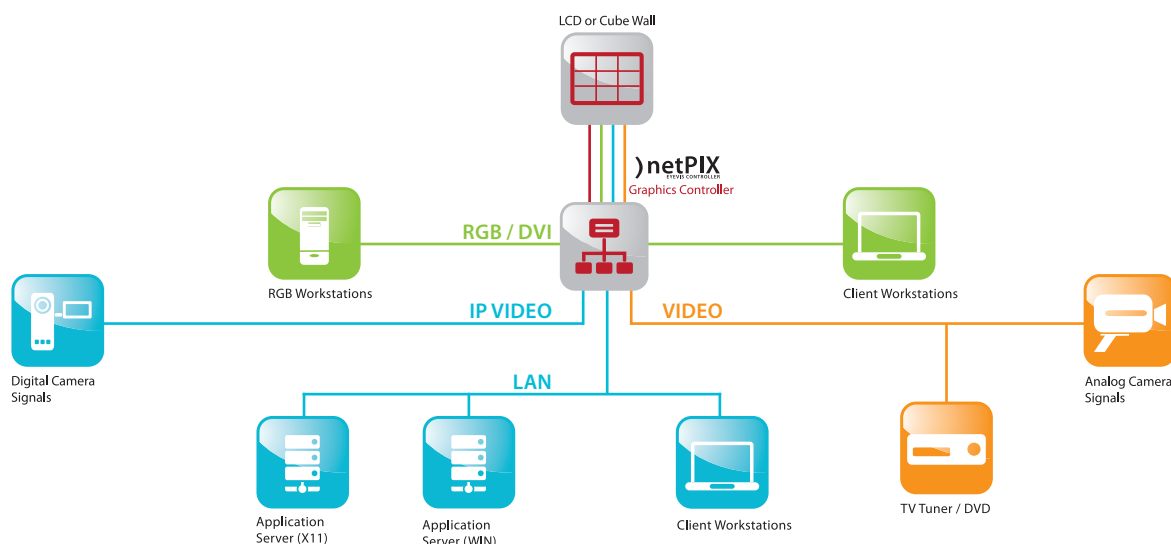

The NPX-4800 provides multiple analog and digital video and graphic connectivity with input cards. Through the new Switch Fabric architecture, video and graphic sources can be displayed simultaneously on the display wall in full frame rates. All analog and digital Video-/RGB-/DVI- and IP Streaming data is transmitted with up to 192GByte/s without any dependencies on the system.

THE ADVANTAGES OF NPX-4800-G3.0 CONTROLLERS

- Expandable for future system upgrades

SYSTEM ARCHITECTURE

The NPX-4800-G3.0 controller relies on a CPU unit and up to 4 expansion chassis. This technology is based on the Intel® XEON® Quad Core® Technology. This new CPU generation provides better performance for the display of high-end visualisation applications compared to other systems

- QUAD CORE Intel Xeon processor up to 3,3 GHz (optionally 12 Cores)
- High-end server components for highest availability
- PCI-Express Bus
- 8GB DDR3 ECC RAM (expandable up to 64GB)
- DUAL Gigabit Ethernet

SYSTEM AVAILABILITY

- Redundant power supply units, hot swappable
- Redundant SATA Solid State Disk with RAID1, hot swappable
- Windows Disk Imaging and Disaster Recovery, in the event of a system or disk crash, security attack or other fatal failure you can restore your entire controller within minutes - no reinstallation is required.
- The controllers from the netPIX 4800 series are built in compliance with eyevis ISO 9001 certificated production processes to meet the specific requirements of each customer and is the best controller for standard control rooms with high availability.

DESKTOP MANAGEMENT & OPERATING SYSTEM

- Because of its MultiScreen-ability, any data and application can be displayed simultaneously; they can also be positioned and resized freely. The operator has a big desktop with a very high resolution at his disposal, which will be multiplied by the size of the wall.
- Windows® XP PRO 32/64 Bit and WIN2003+2008 Server support as well Windows 7 32/64Bit
- Up to 64GB RAM inside the systems reserved for RAM intensive applications
- Huge Windows desktop with up to 32000x32000 pixel depending on the size of the system
- Standard Windows® & X11 applications (optional) and SCADA software can be displayed on the wall with no restriction.
- Windows®-based applications can be displayed simultaneously with any other input signals like video, IP-video and RGB/DVI.

BUS SYSTEM

The core of the system is the ultra-fast PCIe Switch Fabric with PCIe X4 slots and a total bandwidth of 192GB/s for transmitting Windows® information, network data, video, digital streams and graphic signals to each output card. This guarantees a very high bandwidth without decreasing frame rates when numerous inputs are displayed simultaneously
